

Academic Credit Virtual Student Missions | Summer 2022

Overview

Linguae Christi is a missions agency tasked with spreading the Gospel among the indigenous minority language groups of Europe. Our virtual student projects are designed to give students practical experience in their fields of study within a holistic, missions framework. We invite students to apply for work or internship experience, academic credit, or professional development through their academic institution while engaged in our virtual programme.

Learning outcomes

Students who successfully complete our summer programme will:

1. Apply the knowledge gained in the classroom to real-world challenges
2. Develop and employ skills that value teamwork, diversity, and inclusion in the workforce
3. Engage in responsible conduct under the supervision of Linguae Christi staff
4. Articulate what the student learned and how it applies to their professional career
5. Identify skills—personal, relational or professional—that need growth and development

Church Ministries

Requirements

General requirements for this programme can be found in our [virtual student missions prospectus](#). For specific requirements, please see the details listed in the project of interest and its job description.

Evaluation

We understand that institutions may require different forms and frequencies of evaluation. Progress reports and final assessments can be provided on request to meet credit requirements. We invite professors, advisors, and students to contact us in advance of applications in order to determine feasibility.

Next steps

[Contact us via our interest form](#) for the 2022 virtual student projects and include requirements for your class or internship experience.
